Snow data for more than 600 mountain locations in the Western United States are available on the U.S. Department of Agriculture's SNOTEL network. Satellites designed for the collection of meteorological data usually contain cameras and radar systems. This may be related to the interruption of the WU PWS API. To speed up the execution time, I am running the code from September 1, 2019 to today's date (actually I will need to run for a period of a few years). Is the underground climate accurate?
